SUMMARY

IT student with a strong passion for Business Analysis, specializing in system analysis and requirement gathering. I am looking for an internship opportunity to apply my academic knowledge to real world project, learn from team collaboration, and explore how to leverage AI technologies to solve business problems.

PROJECT

IoT Alcohol Tester

- Developed an ESP32-based IoT Alcohol Tester to capture and monitor real-time alcohol levels.
- Use Firebase for real-time data storage between the device display screen and the mobile application.
- Developed an in-app status monitoring feature to track whether the device is currently turned on or off.

Table booking app for Shabu

- Develop a mobile application for booking shabu restaurant tables using Flutter and Firebase.
- Created core features allowing users to view available tables, make a booking, and cancel their reservations.
- Used Firebase to update table availability in real-time, preventing users from booking the same table at the same time.

Restaurant Reservation System (SA Project)

- Requirements Gathering
- Designed data structures and system architecture using Context Diagrams, Data Flow Diagrams, ER Diagram, Use Case Diagrams and Activity Diagram

EDUCATION

Kasetsart University | 2023 – Present

Bachelor of Science Program in Information Technology Faculty of Liberal Arts and Science
(GPA: 2.81)

Internship Period: 23 November 2026 – 23 March 2027

ADDITIONAL INFORMATION

Languages : Thai (Native), English

Soft Skill : Teamwork, Analytical and Problem Solving, Communication, Time management

Technical Skill : SQL, JavaScript, Python, HTML, CSS, Dart, C

Tool : VS Code, Figma, Draw.io, Canva, Microsoft Office, AI Tools
